

# In Hand Souvenir Audio Guides now with **BEACON TECHNOLOGY!**

**Our souvenir audio players are now with simple beacon technology\*. Frees visitors to explore both indoors & outdoors using audio**

Low cost, battery operated beacons which range from 3m+ trigger the audio tracks on our players. No GPS or Wi-Fi required. Low maintenance system  
Simple to adjust and operate.

Your visitor can still take the player home as a souvenir having enjoyed the use of the system on site.

\*Patents pending worldwide.

## SPIKE ISLAND – IRELAND’S ALCATRAZ

Our first installation, 40 beacons across the island both indoor and outdoor. 40 audio tracks activated, in a testing environment open to the Atlantic storms! Beacons trigger audio on the players as visitors enter rooms, approach exhibition showcases and outdoor information panels.

### AUDIOPAYER

### BEACONS

Our **affordable** Audio player needs no third party host device like a laptop or smartphone; it needs no downloads, data, WiFi or Apps. The beacon triggers the player to play automatically – no punching in track numbers, no need to look for a pad or point to initiate audio, the player once powered on is recognised by the beacons and plays the appropriate track at the appropriate point. Secure audio content, battery powered, audio length is from **30 minutes to 3 hours**. Robust and suitable for outdoor use with **tailored visual branding**.

**WITH THIS SIMPLE TECHNOLOGY ENTERTAIN, INFORM, PROMOTE TO YOUR VISITOR**
