

# EDUCATE AND IMPLEMENT

In Hand Guides produce a range of low cost audio and video devices that will powerfully promote your message for education on world **critical issues** such as **Human Rights** (legal processes, migrant rights) and **Disease Prevention and Management** (diabetes, HIV/AIDS).

Our devices hold secure content, are robust - and have been deployed with clients in the African region tackling these issues. **Our devices are completely self-contained, delivering tamper-proof content without the need for wireless connectivity or external power.**

**The simple solution to help educate and implement programs in difficult environments where good local communication is vital to program success.**
