

In Hand Souvenir Audio Guides **FOR THE CAR**

OUR SOUVENIR AUDIOPLAYER CAN NOW BE SOLD TO VISITORS IN CARS.

- Connect via a simple cable which we supply with the unit.
- Simply play the unit through the car audio system using the auxiliary input – most new cars now come with this function.
- The player controls function as normal (tracking, audio volume)

Our souvenir audioplayer approach replaces the hassle of 'rented out systems' for visitors at tourist sites – now they simply buy an audioplayer, enjoy it and take it away.

In Hand Guides now brings this simple approach to visitors in cars. CDs are no longer the only option – switch to our 'In Car Guide' which will still double as a personal player to be enjoyed outside the car.
